# THANKSGIVING'S CRAFT

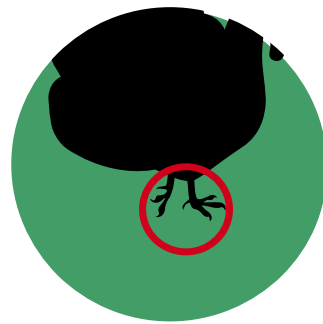

## VOCABULARY

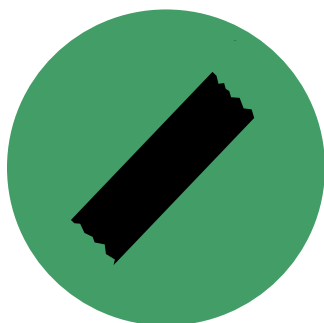

turkey

beak

legs

tape

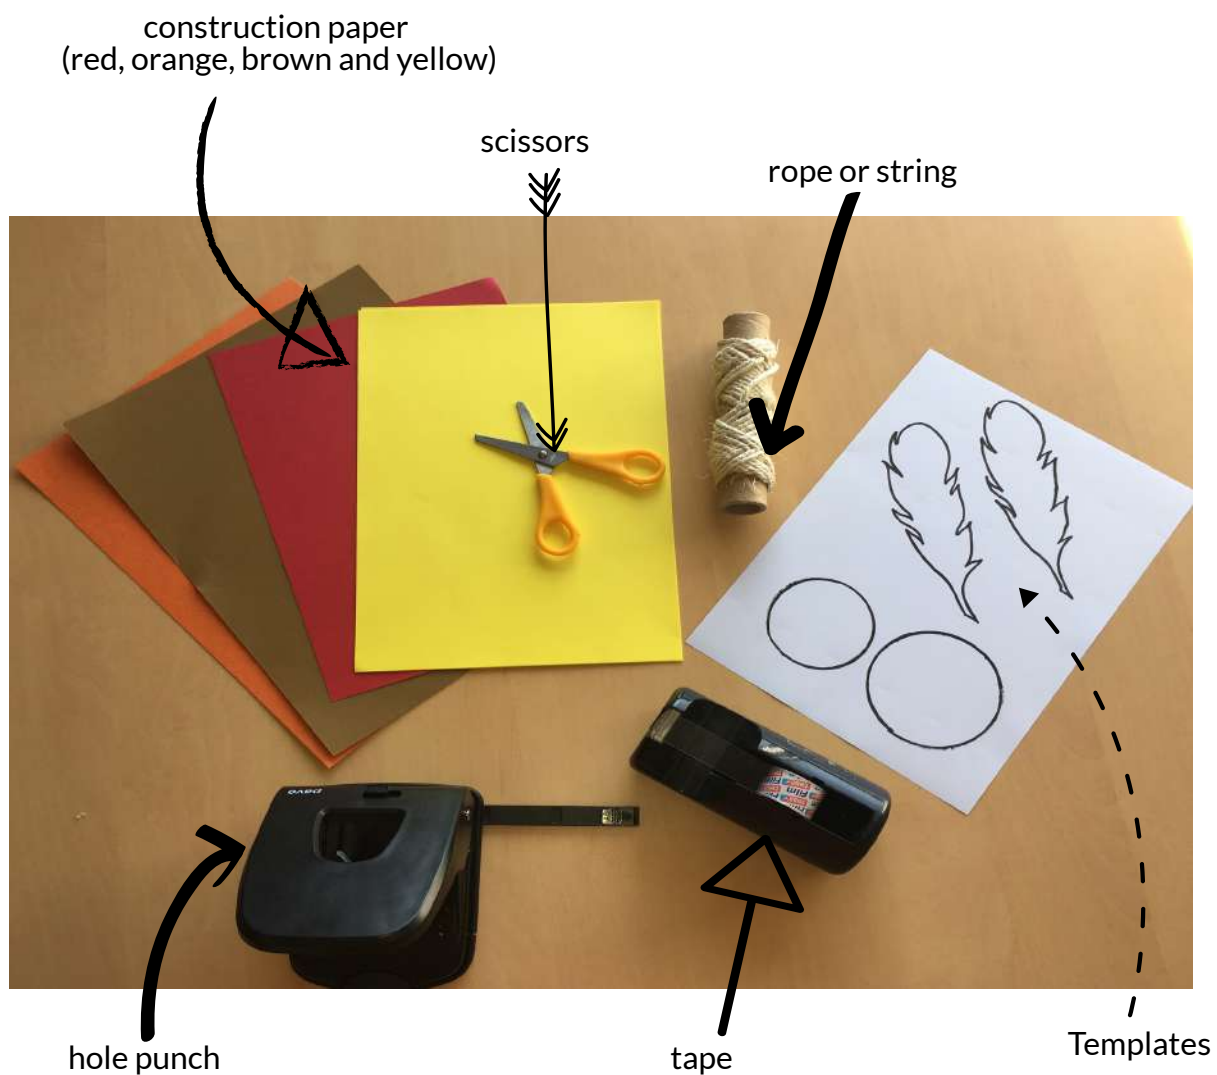

stapler

feather

## You will need :

**+ a stapler or glue**

## STEP 1 : Create the feathers of your turkey :

Using our templates cut out 5 feathers in construction paper of the color you want your turkey to be.

Here, we chose red, yellow and orange.

You can even buy real feathers if you chose, that would be very pretty too.

Then, starting with the feathers, make a pattern until you find a pattern you like. Next, staple the feathers to attach them together

## STEP 2 : The turkey's body

Now, make your turkey body by using the two circle templates in brown paper. Glue them together.

Then, take the body and attach your feather pattern.

Now, add some legs and a beak that you have cut out of your yellow sheet of paper. For the beak, just fold the paper in half and cut a triangle into it. Be creative! Then, attach them to the body using glue or tape.

### STEP 3 : Create the headband

Cut two long strips of paper the color of your choice. Here, we used brown to match the color of the turkey.

Hole punch the two strips of paper.

Attach the strips in the middle, on the back of the turkey.

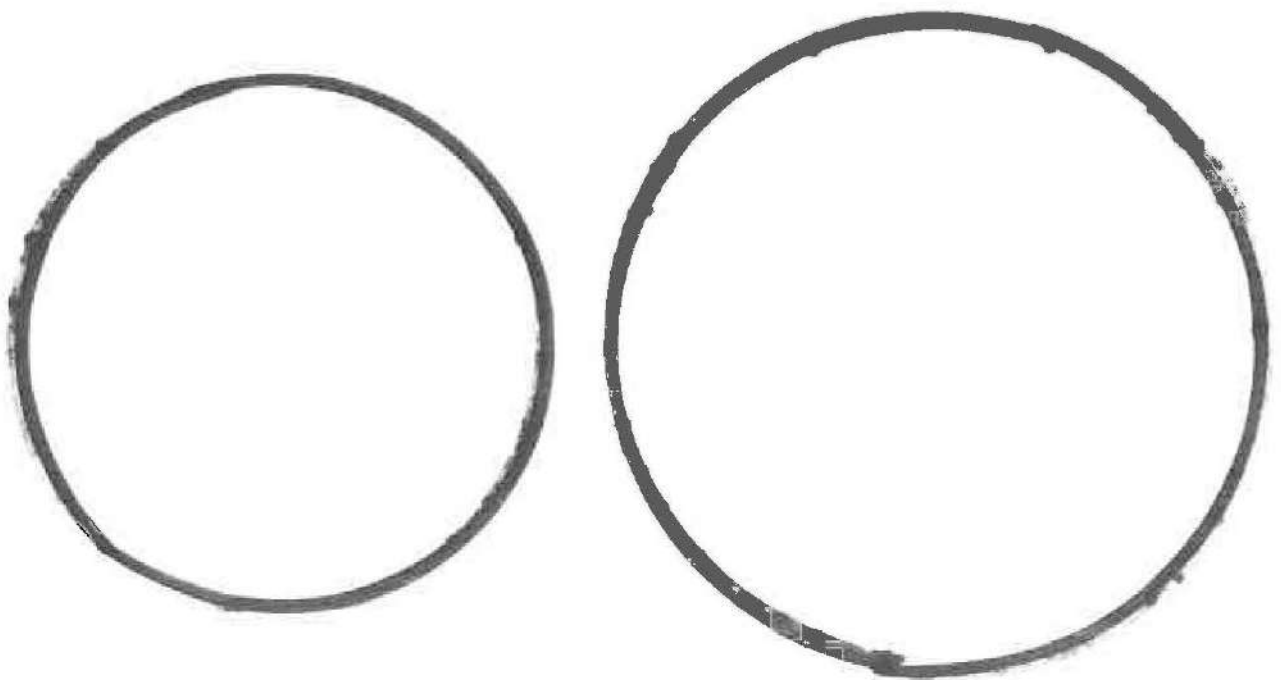

Center your turkey on the front of the head and bring your head pieces to the back. Cut them if they are too long.

Secure with twine. You can now tie a bow and wear it on your head!
